PROFILE

Since 2025 I have worked with a digital agency, starting with on-demand jobs and now as head of web and development. I have been a registered freelancer since 2018. I know agency work from the inside: client sites delivered on time, requirements that change halfway through, changes made on live sites with no staging environment.

I cover both the website, from WordPress and Elementor to WooCommerce, multilingual setups, technical SEO and GDPR, and what sits behind it: custom integrations, APIs, management systems, AI automation. I can also train the rest of the team on new tools. I am looking for ongoing collaborations with agencies, per project or hourly.

EXPERIENCE

Head of Web and Development, Full Stack Developer
2025 - present

Abruzzo Digitale, Giulianova, Italy

- Head of web and development: building and maintaining client WordPress sites, server work, troubleshooting, custom integrations.
- I work on live sites with a fixed method: backup before every change, repeatable scripts, checks on the public site as a visitor, on desktop and on mobile.
- I train the agency staff on new technologies.
- Designed and built GNAMMM, a SaaS platform for restaurants: 10 services in production, 19 live restaurants, showcase site on WordPress.

Full Stack Developer
2023 - present

Datarockers, contract collaboration

- Web apps built to order for different companies: in some projects from analysis to launch, in others only the front end.
- One of the applications reached the final of an innovation competition.

Freelance Software and Web Developer (OrionDev)
2018 - present

Remote and in Abruzzo, Italy

- Websites, e-commerce, management systems and desktop software for direct clients and on Fiverr, where I completed more than 10 projects for Italian and international clients.
- Full rebuilds of existing sites: audit, design proposals, development, multilingual versions, GDPR and SEO compliance.

Coding Teacher and Technical Support
November 2022 - present

Kodland, international online coding school

- 39 classes taught (Python, Scratch, Lua) and over 100 followed as technical support, including onboarding new support colleagues.

SELECTED PROJECTS

- **Terrazza Campailla, Modica:** full rebuild of a holiday rental website: 13-page audit, 4 clickable design proposals, Elementor 4, English version, GDPR, SEO and data for AI search. Lighthouse mobile from 57 to 77, SEO from 92 to 100.
- **L'Ora del Tempo:** logo, product photography and a WordPress site with WooCommerce in showcase mode for a vintage watch collector.
- **oriondev.it:** my own site, in Italian, English and Spanish, with 13 project pages generated by script and published from the command line.
- **GNAMMM:** SaaS platform for restaurants: QR digital menu, back office, and an Android handheld that prints the kitchen ticket. 10 services on Google Cloud Run, 19 live restaurants, one 62-table MySQL database; order analytics brought from 110 seconds to 0.5.
- **Management system for a group of digital agencies:** FastAPI back end, React back office and installable app: quotes, workload planning, reconciled invoices, e-signature, credentials encrypted with Cloud KMS, and an AI assistant that queries the data with the user's own permissions. 153 tables, 220 commits in four months.

- **Manifest AI:** from a tour operator's emails to orders in the management system, with extraction by a language model: 379 emails processed, 221 orders generated, 90.6% of fields correct on the first pass.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, Kotlin, SQL, HTML, CSS, Lua

Back end: FastAPI, Flask, REST APIs, Server-Sent Events, MySQL, MQTT

Front end and apps: React, Next.js, Ionic, React Native, Tailwind, GSAP, PWA, Android with Jetpack Compose, Qt and PySide

WordPress: Elementor (including version 4 with atomic elements), WooCommerce, ACF, Polylang, Rank Math, Contact Form 7, WPCode, WP-CLI

Cloud and servers: Google Cloud (Cloud Run, Cloud SQL, KMS), Azure, Linux and SSH, nginx, Git and GitHub

Artificial intelligence: language models inside the product; Claude, ChatGPT and Codex, GitHub Copilot, local models (Qwen)

Website quality: technical SEO and structured data, GDPR and cookie banners, performance (Lighthouse, WebP, caching)

HOW I WORK WITH AN AGENCY

Timing and communication: frequent updates, problems flagged when they appear rather than at delivery

Live sites: backup, one change at a time, check afterwards; custom code in a plugin the client can open and switch off from the dashboard

Quality checks: typos, broken images and links checked before every delivery

Team: used to working with designers, account managers and other developers on the same site, and to training them on new tools

EDUCATION

High school diploma, Scientific Lyceum (applied sciences track) 2017 - 2022
Liceo Statale Saffo, Roseto degli Abruzzi, Italy

LANGUAGES

Italian: native. English: B2 (upper intermediate), used daily for technical documentation and with international clients.

ADDITIONAL INFORMATION

Driving licence (A1, A2, AM, B). Registered freelancer with an Italian VAT number. Available for travel, on-site or remote work.

I authorise the processing of the personal data in this CV in accordance with Regulation (EU) 2016/679 (GDPR) and Italian Legislative Decree 196/2003.
